

Greenhouse Gas Verification Statement

The inventory of Greenhouse Gas emissions in year 2019 of

Prosperity Dielectrics Co. Ltd.

566-1, Kao-Shi Road, Yang-Mei Dist.,
Taoyuan City, Taiwan (R.O.C)

has been verified in accordance with ISO 14064-3:2006 as
meeting the requirements of

ISO 14064-1:2018

Direct emissions

1,079.0149 tonnes of CO₂e

Indirect emissions

33,373.8869 tonnes of CO₂e

Direct emissions and indirect emissions

34,452.902 tonnes of CO₂e

Authorized by

David Huang

Senior Director

Date: 28 December 2021

Version 1

TGP56A-15-6 2103

SGS Taiwan Ltd.

No. 136-1, Wu Kung Road, New Taipei Industrial Park, Wu Ku District,
New Taipei City 24803, Taiwan

t (02) 22993279 f (02)22999453 www.sgs.com

Statement TW21/00371GG, continued

The emission of each category is described as below:

Unit: tonnes of CO₂e

Reporting Boundaries			GHG Emissions
Inventory categories		Description	
Direct emissions		This direct GHG emissions are the sum of owned or controlled by the organization within the organization.	1,079.0149
Indirect emissions	Imported energy	GHG emissions from imported electricity.	27,800.9535
	Transportation	GHG emissions from business travel by plane.	12.8075
	Products used by an organization	1. GHG emissions from the production of electricity purchased. 2. GHG emissions from the production of diesel purchased. 3. GHG emissions from the production of LPG purchased. 4. GHG emissions from the production of gasoline purchased. 5. GHG emissions from the production of Water. 6. GHG emissions from treatment of waste.	5,560.1259
	Associated with the use of products from the organization	NA	0.0000
	Other sources	NA	0.0000
Direct emissions and indirect emissions			34,452.9018

The emission of each site is described as below:

Unit: tonnes of CO₂e

Site	Direct emissions	Indirect emissions	Total GHG emissions
Yang-Mei	337.7838	17,472.9477	17,810.7315
Luzhu	741.2311	15,900.9392	16,642.1703

SGS has been contracted by Prosperity Dielectrics Co.Ltd. (hereinafter referred to as "PDC"), 566-1, Kao-Shi Road, Yang-Mei Dist., Taoyuan City, Taiwan (R.O.C) for the verification of direct and indirect Greenhouse Gas emissions in accordance with

ISO 14064-3:2006

as provided by Prosperity Dielectrics Co.Ltd. (hereinafter referred to as "PDC"), 566-1, Kao-Shi Road, Yang-Mei Dist., Taoyuan City, Taiwan (R.O.C), in the GHG Assertion in the form of GHG report covering GHG emissions of the period 01 January 2019 to 31 December 2019.

Roles and responsibilities

The management of PDC is responsible for the organization's GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.

It is SGS's responsibility to express an independent GHG verification opinion on the GHG emissions as provided in the GHG Assertion for the period 01 January 2019 to 31 December 2019.

SGS conducted a third party verification of the provided GHG assertion against the principles of ISO 14064-1:2018, ISO 14064-3:2006 in the period 02 Dec 2021 to 15 Dec 2021. The verification was based on the verification scope, objectives and criteria as agreed between PDC and SGS on 14 July 2021.

Level of Assurance

The level of assurance for category 1 and category 2 agreed is that of reasonable assurance.

Scope

PDC has commissioned an independent verification by SGS Taiwan of reported GHG emissions of PDC arising from Electronic component manufacturing activities, to establish conformance with ISO 14064:2018 principles within the scope of the verification as outlined below.

This engagement covers verification of emission from anthropogenic sources of greenhouse gases included within the organization's boundary and is based on ISO 14064-3:2006.

- Title or description activities: GHG verification for PDC in year 2019
- Location/boundary of the activities:
 - 566 & 566-1, Kao-Shi Road, Yang-Mei Dist., Taoyuan City, Taiwan (R.O.C)
 - No.220-1, Sec. 2, Nanshan Road, Lujhu Dist., Taoyuan City, Taiwan (R.O.C)

Statement TW21/00371GG, continued

- Physical infrastructure, activities, technologies and processes of the organization: Electronic component manufacturing
- GHG sources, sinks and/or reservoirs included: Sources as presented in the inventory spreadsheet provided by PDC
- Types of GHGs included: CO₂, CH₄, N₂O, HFCs, PFCs, SF₆, NF₃
- The IPCC 2013 AR5 GWP values are applied in this inventory.
- Emission factor:
 - Direct emissions: Greenhouse Gas Emission Factor Table (6.0.4), EPA.
 - Indirect emissions:
 - Electricity emission factor is 0.509 kgCO₂e/kwh (Announced by Bureau of Energy, Ministry of Economic Affairs in 2020).
 - The secondary database has Carbon Footprint Calculation Platform, SimaPro 9.0.0.41/ Ecoinvent 3
- Directed actions: NA
- GHG information for the following period was verified: 01 January 2019 to 31 December 2019
- The version of inventory sheet: 2021/12/15
- The version of GHG assertion: 2021/12/15
- Intended user of the verification statement: Private

Objective

The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the GHG emissions are as declared by the organization's GHG assertion
- The data reported are accurate, complete, consistent, transparent and free of material error or omission.

Criteria

Criteria against which the verification assessment is undertaken are the principles of ISO 14064-1:2018.

Materiality

The materiality required of the verification was considered by SGS to 5%, based on the needs of the intended user of the GHG Assertion.

Conclusion

PDC provided the GHG assertion based on the requirements of ISO14064-1: 2018. The GHG information for the period 01 January 2019 to 31 December 2019 disclosing emissions of 34,452.902 metric tonnes of CO₂ equivalent and 0.0000 metric tonnes of direct CO₂ emissions from the combustion of biomass are verified by SGS to a reasonable level of assurance, consistent with the agreed verification scope, objectives and criteria.

The emission of each site is described as below:

Unit: tonnes of CO₂e

Site	Direct emissions	Indirect emissions	Total GHG emissions
Yang-Mei	337.7838	17,472.9477	17,810.7315
Lujhu	741.2311	15,900.9392	16,642.1703

SGS's approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions.

We planned and performed our work to obtain the information, explanations, and evidence that we considered necessary to provide a reasonable level of assurance that the GHG emissions of category 1 and category 2 for the period 01 January 2019 to 31 December 2019 are fairly stated.

We conducted our verification with regard to the GHG assertion of PDC which included assessment of GHG information system, monitoring and reporting plan/protocol. This assessment included the collection of evidence supporting the reported data, and checking whether the provisions of the protocol reference, were consistently and appropriately applied.

In SGS's opinion the presented GHG assertion

- is materially correct and is a fair representation of the GHG data and information, and
- is prepared in accordance with ISO14064-1:2018 on GHG quantification, monitoring and reporting.

Confidentiality

The reports and attachments may contain relevantly confidential information of the clients. In addition to being submitted as governmental application or certification documents, the reports and attachments are not allowed to be edited, duplicated, or published without the clients' agreement in written form.

Avoidance of Conflict of Interest

The reports and attachments are completely complied with the standards and procedures that related-authorities established. The reports and attachments of auditing process are conduct with fairness and honesty. If not, the auditing institution not only has to bear the relevant compensation duties, but also to receive legal charge and punishment.

This statement shall be interpreted with the GHG assertion of PDC as a whole.

Verifier Group

Above statements coincide with auditing process with fairness and impartiality, and aim at the emission of year 2019 of clients.
